International Foundation Programme
UEL International Study Centre

Why did you want to come to London and study at UEL?

London is the heart of Europe and a lot of people aim to come to London to study. In my country, I didn't have the same opportunities because my country is not very developed. You can meet a lot of people from different countries; from places like Nigeria, Iran, and Turkey and make many friends here from all over the world.

What's the difference between studying in London and in your hometown?

In my country, the education system is not as up to date as here - that's why I chose London, so I could bring something to my hometown later. I have big plans for

the future; I would like to open a hospital in my hometown with a micro laboratory. Then I would like to open a few branches about five years after opening my first hospital. So, I must come here to study towards my goal.

What did you study during the Foundational year?

We did six modules here: Research and Study Skills, English for Academic Purposes, Mental Wealth, and Business Environment which was very useful for us. Now, we're doing modules in Accounting and Marketing.

One of my favourite modules was Research and Study Skills as I found I learnt basic things which I will need in the future - like where to find resources, how to reference, how to prepare for presentations, and how to prepare for interviews.

What support did you receive from the ISC?

I would like to say I'm very thankful for all my teachers and tutors. They were always on our side, always supporting us and pushing us where it was needed.

My favourite course was Research and Study Skills with a teacher called James, he is the nicest person I've ever met. He was pushing us - motivating us to study hard, and to do everything on time. I learned a lot from him and that module.

Do you have any advice for International students?

Come here, be brave, and don't be afraid of anything. You will get enough support here, and be able to see what life can be like. London is the centre of Europe and the heart of Europe. Come and visit and see for yourself. Why not? Study, travel, see!
